

Why Khalapur is where Mumbai grows next.

[Pune & Growth Corridors](#)[Buyer Education](#)

The investment thesis for the NAINA corridor — what it is, why the infrastructure commitments are real, what the Colliers data says, and how to think about timing. Written as a genuine analysis of the corridor's fundamentals, not as a sales document. Cites specific infrastructure commitments, regulatory frameworks, and transaction data. Ends with a frank assessment of what could go wrong and how to think about risk.

FAQs

Q: Is the NAINA corridor a good investment?

A: The infrastructure thesis is well documented. The outcome for any individual investor depends on developer selection, land title clarity, and holding period.

Q:What is the Mumbai 3.0 corridor?

A: The Karnala-Sai-Chirner New Town — a 324 square kilometre planned urban expansion anchored by the Navi Mumbai International Airport.

Q: How do I verify the investment claims about NAINA?

A: Cross-reference with the Colliers India report, the CIDCO NAINA planning documents, and press coverage of the infrastructure commitments. Oltraya's sources are linked at the bottom of this article.
