

We build on the right land. Finding it is the hardest part

If you are a landowner, investor, or institution with land in Maharashtra's high-growth corridors — we would like to speak with you.

Your land deserves a developer who understands what it took to acquire it.

Land in Maharashtra's high-growth corridors is not acquired easily. It takes patience, foresight, capital, and a willingness to act before the market confirms you were right. The people who hold this land have already demonstrated the intelligence we look for in a development partner.

TRANSPARENT DEVELOPMENT TERMS

Every clause explained, no structures you didn't agree to.

DESIGNED BY CCBS DESIGNS

Named architectural practice, not a generic contractor

FULL REGULATORY COMPLIANCE BEFORE ANY MARKETING BEGINS

Your land is never at legal risk

A FOUNDING TEAM WITH FIFTEEN YEARS OF PUNE MARKET KNOWLEDGE

We know what this land is worth

A BRAND BUILT FOR THE LONG TERM

Our reputation is the collateral we bring to every partnership

What we offer in return is not just development expertise. It is stewardship. We treat every parcel we develop as if we intend to live on it — because the buyers we attract are people who will. That accountability runs through every design decision, every regulatory filing, and every conversation with every buyer who purchases a plot on land you entrusted to us.

We take fewer projects. We execute them completely.

We are building a portfolio defined by the quality of its decisions, not its volume. Every project we accept reflects a clear belief that the land, the timing, the regulatory pathway, and the design potential are all aligned. That discipline is what protects our partners. And what makes Oltraya a brand worth building on.

Land Acquisition Criteria

Location within an identified high-growth corridor — NAINA, Mumbai 3.0, or equivalent.

Minimum 5 acres — we do not develop parcels below this threshold.

Clear title and regulatory pathway — we do not work with encumbered land.

Design potential for community-led plotted or villa development.

Long-term appreciation fundamentals that we can demonstrate to buyers.

Begin A Conversation

If your land meets these criteria — or if you're not sure and would like a frank assessment — we are open to that conversation.
